FIRE SAFETY MANAGEMENT

Fires are destructive and can be sparked off anytime, anywhere. Proper training and safety measures can prevent disastrous consequences and our Fire Safety Management course covers a range of aspects from basic understanding of the origins of fire, potential sources of fire, fire safety & crisis management, and responding appropriately to different fire scenarios.

Delegates of the course will competently understand the importance of distinguishing fire types, with practical knowledge and hands on experience of extinguishing fires with the correct tools.

To complete the course, all candidates will know how to deal with small fires and how to respond and manage a crisis situation. The Fire Safety & Management Course is designed for all levels of Hospitality Staff, School Administrators and Teaching Staff as well as Management Teams, Shopping Centre and Supermarket Staff.

It is also required by Thai Law, that at least 40% of your staff have the proper Fire Safety Training.
